

Danish Technological Institute, Concrete Centre

Description of Danish Technological Institute

The Danish Technological Institute (DTI) is a self-owned and not-for-profit institution. We develop, apply and disseminate research and technologically based knowledge for Danish and International business sectors. As such, we participate in development projects, which are of use to society in close collaboration with leading research and educational institutions both in Denmark and abroad.

On top of this, we carry out consultancy, testing and certification as the main part of the DTI field of business. More information on DTI: <https://www.dti.dk/>

Description of the Concrete Centre

The Concrete Centre at DTI is the largest Danish knowledge centre for concrete technology. We are 37 employees supporting costumers with consultancy, testing and certification in all concrete related topics. Furthermore, we initiate and lead several national and international research and development projects aiming at creating new solutions and technology for the concrete industry in general. The Concrete Centre has a long track record on large infrastructure constructions serving Owners, Consultants and Contractors with expertise on concrete.
