To reserve a seat, please let us know how many from your company that will attend the opening program.

Please forward names and emails of each of the participants to [oil@dti.dk](mailto:oil@dti.dk) before August 15, 2012.

# Microbe Management

DTI Oil & Gas provides solutions within microbe management. We assist operators to monitor and establish control of microbes through a range of services and products, developed in close collaboration with technology leaders in the industry.

DTI Oil & Gas supplies the following products that provide operators with a reliable basis for taking decisions.

## Microbiology testing services

- System surveys and water quality audits
- Customized monitoring programs
- Flexible sampling solutions (IQ Kit®)
- Biocide testing and optimization
- Performance ranking of chemicals
- Pipeline integrity assessment
- MIC Risk Assessment (MICRA™)
- Training courses: MIC, Sampling and Oilfield Microbiology
