To whom it might concern

The purpose of this letter is to give a recommendation of the Danish Technological Institute based on my own experience with the company. The Danish Technological Institute (DTI) insect team has evaluated the utilization of different yeast products at different concentrations as a supplement in insect (black soldier fly larvae (BSFL) production. The evaluation included: No Observed Effect Concentration (NOEC) pre-study, experimental design, pilot scale testing (main study), analysis of relevant reproductive and rearing key performance indicators (KPIs). Furthermore, the DTI insect team was able to disseminate the main results from the project through a scientific poster and through a presentation at an international online webinar.

I am very pleased with the quality of work they were able to provide and consequently, I can warmly recommend the DTI insect team without reservation to others in need of insect feed formulation services.

A few examples of their high-quality services include:

- Customized experimental design, and testing at relevant scale
- Excellent data evaluation and interpretation of results into applied recommendations
- High level of commitment and prompt, effective dissemination and communication
- Excellent project management and timely delivery

It has been a pleasure working with the DTI insect team on this project and I am very happy to recommend them. If I can answer any additional questions about my experience as a customer of DTI, please feel free to contact me under [ahalter@lallemand.com](mailto:ahalter@lallemand.com).

Sincerely,

Annemarie Halter  
R&D and Quality Assurance Director  
Lallemand Bio-Ingredients
