Custom automation solutions for the food industry

With a strong focus on ROI and industry-specific expertise, our solutions empower your business to boost productivity, reduce costs, and stay ahead in a competitive market.

At Danish Technological Institute's 'Food Automation' department, we specialise in customised automation solutions designed to streamline and optimise production processes in the food industry. With a proven track record of tackling complex automation challenges that others shy away from, we deliver solutions that enable our clients to achieve significant efficiency gains and an attractive return on investment (ROI).

Our approach begins with understanding the specific optimisation potential in your production. We then identify the most suitable technical solutions to create the optimal result. From robotic systems and vision technologies to transport conveyors, safety systems, and dedicated machinery, we offer cutting-edge solutions tailored to your unique requirements.

Why choose us?

We specialise in solving complex automation challenges that others avoid, ensuring rapid and efficient implementation to minimise downtime and deliver fast results. Our solutions are return-on-investment-driven, focusing on a strong business case to maximise the value of your investment. With extensive experience in the food industry, we understand your specific needs and provide fully customised solutions tailored to your production setup and challenges.

OUR AUTOMATION SOLUTIONS INCLUDE

- **Robotic Systems:** Automating repetitive or demanding tasks with precision and reliability.
- **Vision and Camera Systems:** Advanced industrial cameras and vision technology to enhance quality control.
- **Conveyors and Material Handling:** Efficient transport systems to streamline production flow.
- **PLC (Programmable Logic Controller):** Centralised control systems for seamless automation.
- **Safety Systems:** Safety fences and systems to ensure compliance and protection for operators.
- **Custom Machinery:** Dedicated machines built for your unique production requirements.

Your competitive edge

Our solutions are not generic — they are designed specifically for your production needs. By partnering with us, you gain access to a team that blends technical expertise with a deep understanding of the food industry's demands. The result? Increased productivity, reduced costs, and a stronger bottom line for your business.

Food innovation for the future
