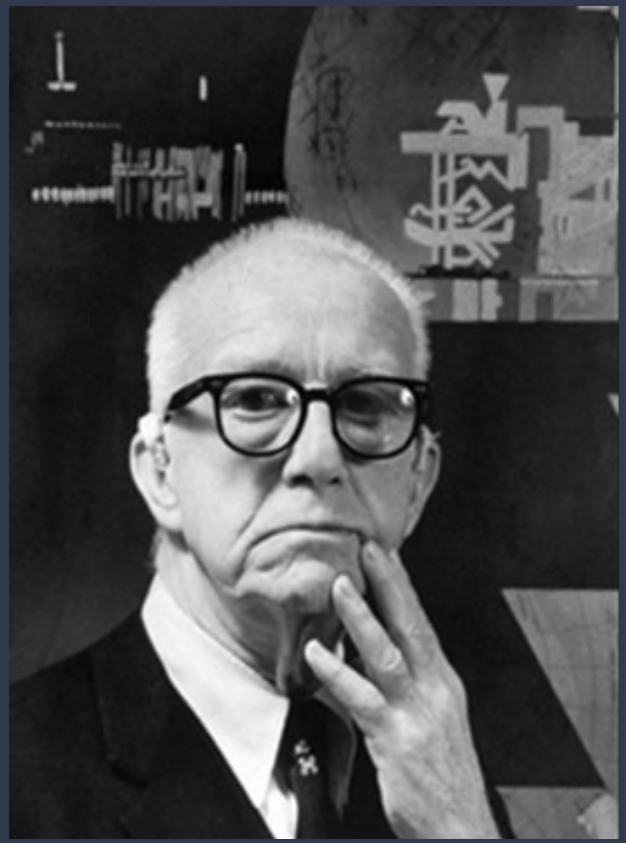
Metrology Driven Software Engineering

Michael L Schwartz - Cal Lab Solutions



You never change things by fighting the existing reality. To change something, build a new model that makes the **existing model obsolete**.

What is Metrology Driven Software Engineering

- It's a **metrology based language**
- It's a method of describing **test requirements in detail**
- **Generic description** /detailed enough to function
- It's a metrology based version of Model Driven Engineering
